## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 44-60, drawn to a semiconductor device, classified in class 257, subclass 618.
- II. Claims 1-43 and 62, drawn to a method, classified in class 438, subclass 287.
- III. Claims 63-76, drawn to probe, classified in class 600, subclass 300.
- IV. Claims 77-78, drawn to a processing system, classified in class 712, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device of group I can be formed without the central channel.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups are unrelated therefore.
